Andrea Orofino
COMPUTER SCIENCE STUDENT

Personal statement

I am a second year BSc computer science student at the University of Brighton with experience in java, python, JavaScript web coding and SQL as well as other subjects revolving around my computer science course, I have worked within groups inside of university and outside university like jobs which would require me to have skills like communication, teamwork leadership skills and general problem-solving skills. My current employment is not a relevant industry to my studies, I am seeking a job preferable within the field of my study.

Skills

- Good communication skills
